Fantastic!

By Casey

We tried a few times to breed crickets for our son's leopard geckos and had no luck until we found this book. Our crickets used to die within a week of bringing them home, so getting them to live long enough to breed was our biggest problem. I never realized that crickets cared so much about space. It turns out, our small keeper was making them eat each other.

Anyway, we finally have a whole bunch of baby crickets. Very thankful that I came across this while browsing my Kindle store.

The author writes enthusiastically about the topic too (who would suspect it, since this is a book about crickets?), but it makes it more pleasant to read.

Good to read, very short.

By Steve

Shorter than I expected. Had I known the length of it, I probably wouldn't have paid the price.
