It will certainly not make you have bad habit, yet it will lead you to have much better behavior to check out book Forest Patches In Tropical Landscapes From Brand: Island Press.

From the Back Cover

In *Valuing Local Knowledge* experts from around the world examine an innovative proposal to promote both cultural survival and biological conservation: treating cultural and indigenous knowledge as a form of intellectual property. Currently the focus of a heated debate among indigenous peoples, human rights advocates, crop breeders, pharmaceutical companies, conservationists, social scientists, and lawyers, the proposal would allow impoverished people in biologically rich areas to realize an economic return from resources under their care. Monetary compensation could both validate their knowledge and provide them with an equitable reward for sharing it, thereby compensating biological stewardship and encouraging conservation. *Valuing Local Knowledge* presents case studies of programs that recognize indigenous rights, and it brings direct experience to bear on the international debate over intellectual property, conservation, and indigenous rights.

FOREST PATCHES IN TROPICAL LANDSCAPES FROM BRAND: ISLAND PRESS PDF

"While tropical forests are being cleared at an alarming rate, the clearing is rarely complete and is often not permanent. A considerable amount of tropical forest exists as remnants that have significant value both for the conservation of biological diversity and for meeting the needs of local people. This volume brings together world-renowned scientists and conservationists to address the biological and socio-economic value of forest remnants and to examine practical efforts to conserve those remnants. An outgrowth of a year-long study by the policy program at the Smithsonian Migratory Bird Center, "Forest Patches in Tropical Landscapes" provides a broad overview of theory and practice, and will help foster both interdisciplinary research and more effective approaches to tropical conservation and development.

Forest fragments in a context

By A Customer

This is an excellent collection of distinct approaches to the forest fragmentation process in tropical landscapes. These approaches include social economical and environmental aspects well based on case studies and scientific data. With one publication it's possible to analyze several points of view and draw an image of the tropical forest's situation.
