Review

"I would recommend this book highly to anyone who teaches a first course in grief and bereavement and/death and dying. It is comprehensive, insightful and scholarly yet retains the sensibility that is needed when discussing the topics. This manuscript covers areas in grief and loss that are not normally addressed."

"I would advise a colleague that this manuscript presents a most comprehensive review of the literature and includes the most thorough documentation to date of the current approaches to the practice of grief counseling."

Great book!

By K. Mitchell

This is a very simple book, quick to read and easy to understand. What I thought was great about it was that it explained grief in a way that was easily understood. Sometimes we can look at grief as a process that we need to go through in stages. This book helps us to understand that although grief is a process, it also flows in and out of the stages, sometimes going backward and forward. The best message it carries is that there are times, especially when we lose parents or spouses, that we just don't get through the process. Once we reach acceptance, we continue to miss the person and although the grief is much, much easier to deal with, we still have it with us in some cases...we just don't reach acceptance and then we're done. We are much more complex than that as human beings. I liked the way the author presented the subject and how easy it was to understand.

I use it in a college class I teach.....

By Richard Donovan

This is an excellent book which provides a good and comprehensive overview of Grief and Loss. The student feedback I've received on it has been excellent. It also includes excellent discussion questions for in-class exercises.

Grief and Loss

By Lorrie White

I read this book as part of a college course. The book was very good and went into a lot of detail. It was a lot of information but interesting!
