#1 selling text with great explanations and just enough anatomy!

Clear explanations and a solid learning framework have been market tested and refined. Fox helps students master the fundamentals by providing appropriate anatomical detail.

Human Physiology, Fourteenth Edition, is intended for the one-semester Human Physiology course often taken by allied health and biology students. The beginning chapters introduce basic chemical and biological concepts to provide students with the framework they need to comprehend physiological principles. The chapters that follow promote conceptual understanding rather than rote memorization of facts. Health applications are included throughout the book to heighten interest, deepen understanding of physiological concepts, and help students relate the material to their individual career goals. Every effort has been made to help students integrate related concepts and understand the relationships between anatomical structures and their functions.

Users who purchase Connect Plus receive access to the full online ebook version of the textbook.

Find a better Textbook. Chapters Cut-off All of a Sudden..

By John Galt

The chapters on the text are stretched out and make it very difficult to study. You will encounter chapters

that cut-off by saying "see chapter 12" and see "chapter 8. figure 3.10" I would have given it 5 stars if it was written in a coherent manner--- meaning the text specifically talks about the topic and finishes talking about the topic before going on to the next chapter. When you study you will be turning the pages A LOT to get your studying done.

By Amazon Customer

Well written, informative, and up to date. I find this book to be an excellent reference to start with when answering any of my questions on this topic. I only need to go to the research papers if I need more details, such as the data sets or the test methods used to explore the points of interest. I also enjoy the structure and pace of the teachings as well as the graphical aids. This book makes the topic fun to learn.
