Informative Book. No pages falling out issues.

By Sunny Skies

This book is a required textbook for my interior design program. The chapters cover topics like paint/wallcoverings, carpet/rugs, window treatments, flooring, wood and more. Each chapter discusses "Key Terms", describes the material, how it is produced and characteristics. This book deals with specifying the materials so there is some discussion of costs, inspection, managing budgets and selection criteria. Each chapter has a specification sample form. Overall, I liked this book and there was a lot of detail. I especially liked the blue boxes that contained helpful tips and hints and "cautionary tales." As a first year student, we did not get into all the chapters, but I felt the ones we covered were in-depth and predominantly well-written. There are a lot of color photographs, which are always welcome. Overall I give this book 4.5 stars.

4 of 4 people found the following review helpful.

poorly made...

By Derek K.

Seriously a joke... the pages started falling apart since day 1!! I've never seen something like that!

The contents are great, I can't say the same thing about the material of which is made of.

Interior Design Materials and Specifications

By Mary Parker

The material content was excellent which I give a 5 star. . However, the physical book itself just completely came unglued. Each page dislodged itself from the spine. I think very strongly that this is a printing production error as all my classmates had the same problem. the actual product gets no stars. However, I have been assured that returning it will not be a problem.
