SCHOOL SPARKS: IGNITE YOUR CHILD'S SUCCESS IN PRESCHOOL, KINDERGARTEN AND BEYOND BY RENEE ABRAMOVITZ PDF

You are your child's first and most important teacher. In this role, you have the opportunity to help your child gain a solid foundation of skills and begin preschool or kindergarten prepared to succeed. This workbook contains over 450 worksheets and 450 activity suggestions that are designed to: - Introduce important school readiness topics in a fun, engaging and non-intimidating way. - Help your child develop important skills such as the correct pencil grip, letter and number awareness, strong listening skills and more. - Familiarize your child with challenging activities he will encounter in a preschool or kindergarten classroom so they are not unfamiliar or intimidating when school begins. - Help your child gain confidence in his academic abilities and begin to view himself as a smart, capable student. By working with your child for less than one hour each day, you can ensure that he feels confident, prepared and secure from the moment he begins his first day of school. The confidence gained from this familiarity will allow him to embrace challenges and launch a self-fulfilling cycle of academic success.

Nice Worksheets, One Disappointment

By thisboymom

I have been printing worksheets from School Sparks since I started homeschooling my kindergartner last fall. Lots of great preschool and kindergarten worksheets. I recently went to print their dolch flashcards and sentence worksheets for first grade, and when I clicked on the link, a bubble popped up mentioning this book. I have a preschooler this year also, so I decided to go ahead and purchase the book to save on printing.

The worksheets are the same great ones from the website...except they're already printed for you, on a nice weight paper. The pages are perforated so that you can tear them out of the book neatly. My one disappointment (hence the 4 star rating) is that the pages from the website that originally led me to purchasing this book, aren't included in the book. I understand that not every worksheet on the webpage is included, but my feeling is that if you have a pop up on the website saying you can get worksheets in this handy book, that particular worksheet should be included in the book.

Other than that, I love this and will definitely get lots of use out of it.

Good value

By ilyaskhan

I just received the book and am really impressed. Lots and lots of worksheets for your preschooler. Its a good value for your money cause it is as thick as a telephone directory. I took of some of the sheet and placed them in sheet protectors so that my kid can redo that worksheet again n again.

Highly recommend if you are looking for prep work that is fun

By PRwhiz

I have been spending time trying to "home-school" or rather teach my 3 yr old and 2 yr old things they will need for Pre-K and kindergarten. They can count, know their shapes, colors and many basic skills already but I was looking for something that would really help them fine tune the basics as well as help me figure out new things to teach them because I just wasn't sure of what to do next. I was looking into online programs but nothing seemed to be a good fit for me and our schedule. This book has been great. For my 3yr old, the way its laid out gave me a real understanding of what "skills" means: fine motor skills, recognition etc. not just how to count or memorize. My 3yr old enjoys working in the book and taking out the sheets. Its things she recognizes like letters and numbers but is learning about them in different ways such as tracing or matching and even math and graphs. She literally can spend about an hour easily doing sheet after sheet. While she doesn't do every activity perfect, I see that it gives her confidence as she moves on to the next activity and each time I see her getting better and better.

My 2-yr old gravitates to the simple pictures and easily grasps most of the concepts like matching, shadows, coloring and counting.

As someone who was using a lot of online tools and videos, this is a solid foundation you can't get from online or video learning.
