I recommend Ultra P.A.S.S. if you don't want to spend the money to go to a physics (SPI) review course
By Dr Karamanoukian

I would rate this book 5 star. It not only is full of information that is useful, but it is practical and there is "no fluff" in the text. Not a single sentence is in the book as 'filler' information. The authors have spent an indordinate amount of time in getting a lot of information in the book that is well written, easy to understand and process and very useful for the practicing sonographer and vascular interpreting physician.

CD's are also included in the back of the book and they are interesting to listen to while driving back and forth from work. I recommend this book and CD's for those preparing for registry examinations. I imagine that if you were to spend three days in this course you would spend well over \$1500 in travel time, lost work time, registration fee for the course and hotel room and airfare. The book and the contents are well worth the cost.

I recommend this material very highly.
